

Online Test Your Knowledge Quiz

SPONSORSHIP

Chemical Engineering's website offers an enjoyable way to educate decision makers about a new or existing technology, product or service. Promote your brand to the CPI audience while driving traffic to your own website and generating leads through the Test Your Knowledge Sponsorship.

SPONSORSHIP FEATURES & BENEFITS:

- » An enjoyable way to educate decision makers about a new or existing technology, product or service
- » Sponsor's brand can be promoted on 5-10 questions throughout the quiz
- » Sponsor's logo featured on each page of the quiz
- » Enhanced marketing message through content marketing on a trusted, reliable industry website
- » *Chemical Engineering* promotes the monthly quiz on Twitter, LinkedIn and E-newsletters to increase your reach to the chemengonline.com audience
- » Additional lead generation opportunities available
- » Contact your sales representative for more information

Beyond convenience, there are several reasons to consider automating the cleaning of tanks, totes, vats, vessels and other process containers. First is the improved thoroughness of the cleaning operation. Second is the reduced exposure of workers and the environment to hazardous cleaning chemicals. A third consideration is the savings in downtime and maintenance associated with manual cleaning. For most sectors of the chemical process industries (CPI), the choice of a cleaning process, cleaning intervals and the extent of cleaning are decisions made solely at the discretion of the processor.

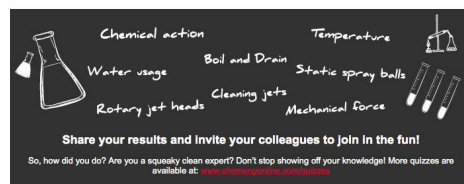

Are you an expert on tank cleaning? [Take this 10-question quiz and find out!](#)

- What is rotary jethead/rotary impingement tank cleaning?
- What are the problems with manual tank cleaning?
- What tank cleaning method is almost always ineffective and costly?
- When cleaning totes/bulk containers in the field, is fill and drain the most effective method?
