How to write your advertorial for a *Chemical Engineering Magazine* Special Advertising Section

We are grateful for your advertising support and pleased to offer you the opportunity of free advertorial space.

Within reason you are welcome to use your advertorial space in any way you wish. However, we have a few “house rules” to provide a consistent look across the section. So please:

- » Send 350–400 words for a 1/2 page write-up, 250–300 words for 1/3 page, or 150–200 words for a 1/4 page.
- » Write in the third person (for instance “the company” or “YourCorp., Inc.” instead of “we”), and don’t address the reader directly.
- » No ® or ™ symbols, please. They never appear in standard magazine editorial.
- » If possible, include a headline that will comfortably fit the available space. For a standard half-page of advertorial this is likely to require 35–48 characters, but check a sample copy. Smaller advertorials and vertical layouts will need fewer characters. The head should not include your company or product name.
- » Similarly, it helps to include a deck (subhead) of roughly the right length. For a standard half page this is generally 130–160 characters; again, check a sample copy. The deck should include your company name; product names are optional.
- » One illustration is normally enough, though it’s sometimes possible to use two small ones. A single large illustration can look striking, but there is a trade-off with the length of the text (which is one reason why it’s hard to be precise about word counts).
- » Please try to include a caption for your illustration, especially if it shows a particular product or plant. Make sure you have copyright clearance for your illustration.
- » Illustrations can work well in either landscape or portrait orientation; landscape gives more flexibility with layout. Cutouts (vignettes) against a plain background or with clipping paths are welcome.
- » We can handle most graphics file formats, but for photographs a good-quality JPG suitable for printing at 300 dpi is fine. Please send illustrations as separate files, not embedded in Word documents.
- » For diagrams and charts, vector artwork (Adobe Illustrator or vector PDF) is much preferred. Remember that graphics with narrow lines and small text do not work well at small column widths.
